participation in the Side Events of COP17

COP17, aka The Seventeenth Conference of the Parties of the United Nations Framework Convention on Climate Change (UNFCCC) and CMP 7, will be held this year in Nov., Durban, South Africa.

Recycle Energy Co., Ltd. was selected by Jetro to attend the Japan Pavilion in the upcoming Side Events of COP17.

This conference, based on UNFCCC (an international environmental treaty opened for signature at the Earth Summit in 1992), has become the supreme decision-making body to establish national greenhouse gas inventories of greenhouse gas (GHG) emissions and removals.

The parties to the convention have met annually from 1995 in Conferences of the Parties (COP) and this conference has played an important role in global environmental protection. At the COP3 in 1997, the Kyoto Protocol was concluded and established legally binding obligations for developed countries such as Japan to reduce CO2 emissions.

It is a great honor for us to be able to participate in the Side Events. Via this chance we hope all the government officials, academic scholars and staff from NGO would have a better understanding about our oil-converting plant.

We will keep on our research from now on as usual.
